

1	Sum of Array Elements
Problem Statement	Write a program to find the sum of all elements in an array.
Input Format	First line: An integer N (size of array) Second line: N space-separated integers.
Output Format	Print the sum of all elements.
Sample Input	5 2 4 6 8 10
Sample Output	30

2	Maximum Element in Array
Problem Statement	Write a program to find the maximum element in an array.
Input Format	First line: An integer N Second line: N space-separated integers.
Output Format	Print the maximum element.
Sample Input	6 3 8 2 9 5 1
Sample Output	9

3	Minimum Element in Array
Problem Statement	Write a program to find the minimum element in an array.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print the minimum element.
Sample Input	4 7 3 5 2
Sample Output	2

4	Count Even and Odd Numbers
Problem Statement	Write a program to count the number of even and odd elements in an array.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print two integers – count of even and count of odd numbers.
Sample Input	5 1 2 3 4 5
Sample Output	2 3

5	Reverse the Array
Problem Statement	Write a program to print the elements of an array in reverse order.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print the array elements in reverse order.

Sample Input	5 10 20 30 40 50
Sample Output	50 40 30 20 10

6	Search an Element in Array
Problem Statement	Write a program to search for an element in an array.
Input Format	First line: Integer N Second line: N space-separated integers Third line: Integer X (element to search).
Output Format	Print "Found" if X is present, otherwise "Not Found".
Sample Input	6 2 4 6 8 10 12 8
Sample Output	Found

7	Copy Elements to Another Array
Problem Statement	Write a program to copy all elements from one array to another.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print elements of the new copied array.
Sample Input	4 5 10 15 20
Sample Output	5 10 15 20

8	Find Frequency of Each Element
Problem Statement	Write a program to find the frequency of each element in the array.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print each element with its frequency.
Sample Input	6 1 2 2 3 1 4
Sample Output	1→2 2→2 3→1 4→1

9	Sort the Array in Ascending Order
Problem Statement	Write a program to sort the elements of an array in ascending order.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print sorted array elements.
Sample Input	5 4 2 8 6 1
Sample Output	1 2 4 6 8

10	Find Second Largest Element
Problem Statement	Write a program to find the second largest element in an array.
Input Format	First line: Integer N Second line: N space-separated integers.
Output Format	Print the second largest element.
Sample Input	6 12 35 1 10 34 1
Sample Output	34
