

C++ Solutions — Conditional Statement Practice Questions

Below are concise, ready-to-compile C++ solutions for each of the 10 problems. Each problem has its own `main()` so compile separately (or copy into a single file with a menu).

1) Check Positive, Negative or Zero

```
#include <iostream>
using namespace std;
int main() {
    long long N;
    if(!(cin>>N)) return 0;
    if (N>0) cout<<"Positive";
    else if (N<0) cout<<"Negative";
    else cout<<"Zero";
    return 0;
}
```

2) Check Even or Odd

```
#include <iostream>
using namespace std;
int main() {
    long long N;
    if(!(cin>>N)) return 0;
    cout << ( (N%2==0) ? "Even" : "Odd" );
    return 0;
}
```

3) Check Leap Year

```
#include <iostream>
using namespace std;
int main() {
    int y;
    if(!(cin>>y)) return 0;
    bool leap = (y%4==0 && y%100!=0) || (y%400==0);
    cout << (leap ? "Leap Year" : "Not a Leap Year");
    return 0;
}
```

4) Largest of Two Numbers

```
#include <iostream>
using namespace std;
```

```
int main() {
    long long A,B;
    if(!(cin>>A>>B)) return 0;
    cout << (A>B ? A : B);
    return 0;
}
```

5) Largest of Three Numbers

```
#include <iostream>
using namespace std;
int main() {
    long long A,B,C;
    if(!(cin>>A>>B>>C)) return 0;
    long long mx = A;
    if(B>mx) mx=B;
    if(C>mx) mx=C;
    cout<<mx;
    return 0;
}
```

6) Check Vowel or Consonant

```
#include <iostream>
using namespace std;
int main() {
    char c;
    if(!(cin>>c)) return 0;
    char ch = tolower(c);
    if (ch=='a' || ch=='e' || ch=='i' || ch=='o' || ch=='u')
        cout<<"Vowel";
    else
        cout<<"Consonant";
    return 0;
}
```

7) Check Divisible by 5 and 11

```
#include <iostream>
using namespace std;
int main() {
    long long N;
    if(!(cin>>N)) return 0;
    cout << ( (N%5==0 && N%11==0) ? "Divisible" : "Not Divisible" );
    return 0;
}
```

8) Check Alphabet, Digit or Special Character

```

#include <iostream>
using namespace std;
int main() {
    char c;
    if(!(cin>>c)) return 0;
    if ((c>='A' && c<='Z') || (c>='a' && c<='z')) cout<<"Alphabet";
    else if (c>='0' && c<='9') cout<<"Digit";
    else cout<<"Special Character";
    return 0;
}

```

9) Check Uppercase or Lowercase

```

#include <iostream>
using namespace std;
int main() {
    char c;
    if(!(cin>>c)) return 0;
    if (c>='A' && c<='Z') cout<<"Uppercase";
    else cout<<"Lowercase";
    return 0;
}

```

10) Eligibility to Vote

```

#include <iostream>
using namespace std;
int main() {
    int age;
    if(!(cin>>age)) return 0;
    cout << (age>=18 ? "Eligible" : "Not Eligible");
    return 0;
}

```
