

Design Thinking Assignment-1.

Q. Industry	Example	How design thinking was used	Outcome
Technology	<u>Microsoft</u>	People with physical disabilities were not able to play video-games, so Microsoft created special controllers with oversized buttons and plug-in options.	Expanded X-box ecosystem to millions of new players, and won awards for innovation and inclusive design.
	<u>Amazon</u>	Identified people's need of hands-free support in everyday tasks, so Amazon launched Echo with Alexa, supported with voice commands.	Alexa grew rapidly among masses, and everyday home and work tasks were so easy and quick now.
Banking and Finance	<u>DBS Bank</u>	Redesigned products, services, trained staff, collaborated in workshops to change its old bureaucratic processes.	Loan approvals reduced from days to a few clicks; opening new accounts, transferring funds without visiting branches.
	<u>Paypal</u>	Removed multi-stepped checkout, billing processes were shortened. 'One Touch Checkout' was ensured.	Checkout time reduced from minutes to seconds. Boosted transaction volumes by billions. Gained trust and loyalty of customers.

<u>Industry</u>	<u>Example</u>	<u>How design thinking was used</u>	<u>Outcome</u>
Automotive	<u>Toyota</u>	created first mass-market hybrid car - Toyota Prius because traditional cars didn't meet need for fuel efficiency. Fulfilled the demand of eco-friendly vehicles.	Fuel consumption reduced by 50%, millions of Toyota Prius were sold, became a symbol of eco-friendly mobility, influenced global automakers.
	<u>Volvo</u>	automatic break systems were installed, pedestrian detection, adjustable seats designed for child safety.	Severely reduced risk of deaths in accidents. Customer trust was increased, influenced automotive industry to standardize advance safety systems.
FMCG	<u>Johnson & Johnson</u>	Noticed the fear of bandages in children, traditional bandages were unappealing. So they made bandages with popular characters printed on it, vibrant colors and children-centric things.	Removed children's fear of bandages, built brand loyalty as a child-focused healthcare company, boosted sales, demonstrated the power of empathy-driven product innovation in FMCG.
	<u>Nescafé (Nestlé)</u>	Addressed struggle of people to get high-quality coffee at home as it was time-consuming. So they made pre-measured coffee capsules, automatic brewing machines.	Making coffee got easy, daily convenience, increased the market of customers in coffee segment of beverages.

<u>Industry</u>	<u>Example</u>	<u>How design thinking was used</u>	<u>Outcome</u>
Health care	<u>Philips Healthcare</u>	Noticed devices with confusing interfaces, alarm fatigues from false alerts, difficulty in quick interpretation in critical conditions; so they made Intellivue patient monitors with color-coded alerts, screen adjustments for easy reading, smart alarm systems, customizable view,	Reduced monitoring errors, improved response time, enhanced nurse satisfaction and reduced stress, positive impact on patient outcomes. This strengthened Philips' reputation as a leader in healthcare technology innovations.
	<u>Cleveland Clinic</u>	Recognized patients' worldwide faced difficulty in accessing specialist care due to geographic distances, and long waiting times. So Cleveland Clinic created 'MyConsult', a platform for second opinions by specialists. Developed simple logins, appointment scheduling, user-friendly UI, easy document uploading process.	Expanded the access of healthcare to even underserved regions. Reduced appointment waiting times and travel costs. Increased patient satisfaction.

Q2. Defining the Goal - To establish good relations of first year students with seniors.

- Provide a safe and enjoyable environment.
- Conduct innovative games and activities that enhance students' creativity.
- Smooth logistics and management.

Multidisciplinary Team - This team ensures all aspects of the event are covered and the event runs smoothly.

- A multidisciplinary team should include the following departments:
 - ⇒ Project leader
 - ⇒ Theme designer
 - ⇒ Logistics and Operations coordinator
 - ⇒ Sponsorship and Finance Manager
 - ⇒ Marketing team
 - ⇒ Hospitality team
 - ⇒ Safety and Healthcare team.

Assigning Roles - Project leader would include one member who will invigilate all other teams, maintain coordination and respect the timeline boundaries.

- Theme designers would include two to three members to design themes and ideas for decoration and entertainment. They might have some assistants and supporters for fast completion of their jobs.
- Logistics & operation coordinators would include two members for venue bookings, seating, lighting, sound systems.
- Finance and Sponsorship managing would be handled by one person who will prepare the budget, collect funds, manages expenditure and finds sponsor.

- Marketing Team would include two to three members who would design posters, run social media campaigns, invite the students, participants, and also make announcements.
 - Hospitality Team would include two to three members to welcome the students, participants, and ensure their smooth participation and enjoyment, and also manage the refreshments for the students and participants.
 - Safety and Healthcare team would have one member as a head of the team and two assistants for emergency and critical situation handling. They should know the basics of healthcare, and procedures and protocols to proceed with, when there is a case of emergency.
- Setting the Norms for the Team - Norms are necessary for smooth productivity and easy and effective event management.
- (i) Good Communication - weekly/Regular checks of the progress of the team, ~~throg~~ through social media group like on whatsapp.
 - (ii) Healthy and equal decision making - Decisions should be made collaboratively, and if there's any conflicts, voting should be done.
 - (iii) Accountability - Each member should hold the accountability of his/her task and complete it before deadlines to avoid delays in event.
 - (iv) Respecting each other - encourage and motivate everyone for their contribution and avoid criticism and asserting dominance.
 - (v) Flexibility - Always be ready to modify plans according to present conditions.

- (VI) Documentation - Keep records of each decision, expenditure of money, for easy progress, further budget planning transparency.
- (VII) Motivation - Celebrate small milestones and progresses to maintain and boost team morale and energy and motivation. The team can also set mini-rewards for milestone completion.
